Faculty of Science and Technology
Department of Computer Science
CSC 3215: Web Technologies

**Semester:** Summer 2025-26 **Group No:** 6 **Section:** J

**Group Members:**

| SL. | Student ID | Name | Role | Signature |
|---|---|---|---|---|
| 1 | 23-55218-3 | Najiat Islam Rishad | Group Leader | |
| 2 | 24-56493-1 | Ryan Ferdous Kabir | Member | |
| 3 | 23-53042-3 | Partho Nath Ghosh | Member | |
| 4 | 23-55140-3 | Sadia Afrin Ananna | Member | |

**Project Title**

EduQuiz

### Short Description

EduQuiz is a role-based web application developed using PHP and MySQL. It allows Admins, Instructors, and Students to manage courses and quizzes through a shared login and registration system. Admins manage users and courses, Instructors create courses and quizzes and view student performance, while Students enroll in courses, attempt quizzes, and view their results.

### Introduction

Educational institutions need a simple and centralized system for course management and student assessment. EduQuiz provides a single web platform for three types of users—**Admin, Instructor, and Student**—with separate dashboards based on their roles. The system supports user authentication, course enrollment, quiz creation, automatic scoring, and result tracking.

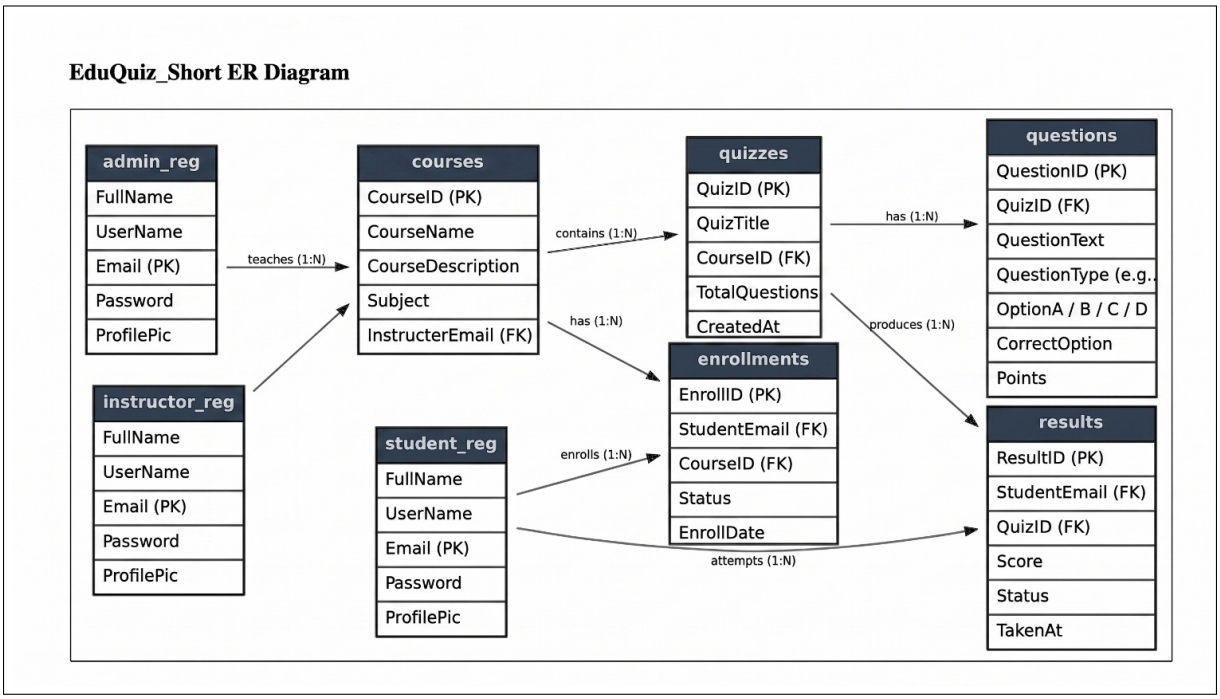

### Background Study

EduQuiz is designed as a lightweight and easy-to-self-host web application. It provides the basic Learning Management System (LMS) functions, including course management, enrollment, quizzes, and result tracking, while remaining simple to develop, deploy, and maintain using standard PHP and MySQL.

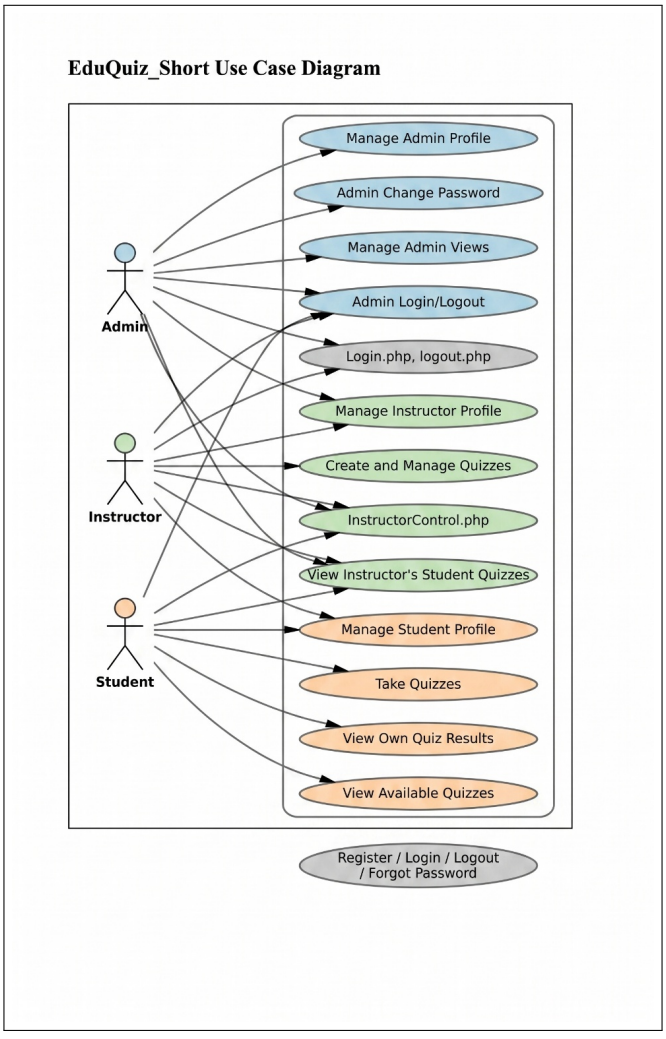

### System Architecture (MVC)

The project follows the **Model–View–Controller (MVC)** pattern. The **Model** (`model/`) contains every SQL query, the **View** (`View/` folders) only shows HTML pages, and the **Controller** (`Control/` folders) checks the input, calls the Model and decides which page to show. Login, registration, profile and password pages are shared by all users and are kept in the `Auth/` folder, while `Admin/`, `Instructor/` and `Student/` hold each role's panel.

**Types of User**

1. **Admin**
2. **Instructor**
3. **Student**

**Common Features (Available to All Users)**

- **Authentication**
    1. Login to the system
    2. Logout from the system
    3. User registration as Student or Instructor
    4. Remember Me option during login
- **Account Management**
    1. Change or reset password
    2. View profile information
    3. Edit profile information
    4. Delete account
- **Dashboard**
    1. Access a personalized dashboard after login
- **Additional Feature**
    1. AJAX-based username, email and phone availability checking during registration

**Specific Features by User Type**

- **Features of Admin**
    1. Manage Student and Instructor accounts, including viewing, activating/deactivating, and deleting users.
    2. View and manage courses available in the system.
    3. View system-wide statistics such as students, instructors, courses, quizzes, and quiz attempts.
- **Features of Instructor**
    1. Create and manage their own courses.
    2. Create multiple-choice quizzes and questions for courses, and see the questions of each quiz.
    3. View student quiz results, scores, and pass/fail status (pass mark: 40%).
- **Features of Student**
    1. Browse available courses and enroll in them.
    2. Attempt multiple-choice quizzes for enrolled courses.
    3. View enrolled courses, quiz attempts, scores, average performance, and previous results.
